SUMMARY

Data Analyst who believes that data is the true engine of growth and smart decision-making in the business world. I work on transforming raw data into strategic insights that help companies understand markets and customers and improve performance. I started my journey with a background in studying human behavior through social work, then gained practical experience in commerce, customs clearance, and stock trading, which strengthened my ability to connect digital analysis with real business reality.

EXPERIENCE

Applied AI & Data Analytics | Digilians (MCIT & Egyptian Military Academy) Dec 2025 – Present

- Intensive diploma focused on Applied Artificial Intelligence and Data Analytics.
- Analyzing large datasets using Python and SQL to extract meaningful insights.
- Developing predictive models using Machine Learning and Deep Learning techniques.
- Designing interactive Power BI dashboards to monitor KPIs and communicate insights effectively.
- Applying statistical methods to solve real-world analytical and business problems.

Customs Clearance Coordinator | Egy Trade 2023 – 2025

- Executed and monitored customs clearance procedures for vehicle imports, with structured management of large-scale operational data and documentation.
- Reviewed and audited records to ensure data accuracy, consistency, and compliance with customs regulations.
- Tracked shipment status and clearance timelines using data tools (like Excel) to identify bottlenecks, delays, and improve operational efficiency.

Founder & Operations Manager | Small Business (Apparel Retail) 2021 – 2023

- Established and managed an apparel retail business, utilizing data-driven strategies to optimize daily operations and sales.
- Tracked and analyzed sales data and inventory levels to identify top-performing products and understand customer preferences.
- Leveraged data insights to make informed purchasing and pricing decisions, reducing dead stock and maximizing profitability.

TECHNICAL SKILLS

- **Programming & Databases:** Python, SQL.
 - **Data Visualization & BI:** Power BI, Tableau, Microsoft Excel.
 - **Machine Learning & AI:** Machine Learning (Prediction, Classification, Segmentation), Deep Learning, Data Mining.
 - **Data Analysis & Statistics:** Statistical Analysis, Applied Statistics, SPSS.
 - **Cloud & Tools:** Microsoft Azure (Fundamentals).
 - **Soft Skills:** Analytical Thinking, Problem Solving, Business Acumen, Communication.
-

CERTIFICATIONS

- **Specialized Diploma in Applied AI & Data Analytics** | MCIT & EMA (In Progress).
 - **Google Advanced Data Analytics Professional Certificate** | Coursera (Dec 2025).
 - **Data Analysis with Excel Power Tools** | DataCamp (Dec 2025).
 - **Associate Data Analyst in SQL** | DataCamp (Aug 2025).
-

EDUCATION

- **Bachelor of Social Work** | Higher Institute of Social Work, Port Said (2022).
-

LANGUAGES

- **Arabic:** Native.
- **English:** Professional Working Proficiency.
